

BOOSTER®

CDL Academy

When you partner with Booster, we're committed to your success and longevity.

**20-HOUR
HAZMAT AND
TANKER
ENDORSEMENT
COURSE**

The Booster CDL Academy's Tanker and Hazmat Endorsement course is created with efficiency and flexibility in mind, providing students the necessary knowledge to pass the HazMat exam and safely transport hazardous materials.

Students will undergo 20 hours of classroom-only instruction time — no equipment or hands-on training needed!

Flexible Training Options

While traditional training courses are resource- and downtime-heavy, Booster's CDL Academy streamlines the process with flexible classroom options.

Virtual learning:

Allows drivers to complete their training while already on the job. Drivers can take classes on the weekends or at night, with as many or as few students as needed.

In-person training:

Drivers have the option of learning side-by-side with their peers. Booster instructors can come to your location to provide training, or trainees can come to Booster's classroom locations.

What Your Company Gains:

- ✓ Highly skilled, multi-certified drivers
- ✓ Access to a larger hiring pool
- ✓ Ability to offer in-house CDL training with low overhead costs
- ✓ Reduced attrition rate - 94% of employees say they would stay at a company longer if it invested in their career development

What Your Drivers Gain:

- ✓ Quick, easy access to increased certifications
- ✓ Renewed knowledge within a changing industry
- ✓ Career advancement and skills building

Credentials

Booster CDL Academy is authorized by the US Federal Motor Carrier Safety Administration.
