

# BOOSTER®

## FAQ

### 1. What is mobile fuel delivery?

Mobile fuel delivery is a service where fuel is delivered and administered directly on-site for your vehicle.

### 2. How does it work?

One of our mobile energy consultants will work with you to identify and put together a strategy for your fueling needs such as the type of fuel you need, how many vehicles need fueling, and when your vehicles are available for fueling. Once you're ready to start, trained service professionals will visit your fleet to safely fuel your vehicles.

### 3. How does Booster save me money?

Booster helps improve your fleet's overall efficiency and productivity by eliminating off-route mileage, vehicle costs, labor costs of time spent fueling, and theft.

### 4. What types of businesses does Booster serve?

We serve all types of businesses who operate a fleet or have bulk fuel needs.

### 5. What types of energy does Booster provide?

We provide gasoline, diesel, renewable diesel, ethanol blends, synthetic blends, biodiesel, and diesel exhaust fluid.

### 6. Where are Booster services available?

We are currently active in various locations coast-to-coast of the U.S. and are expanding to more areas. If you are interested in working with Booster but are not in any of these locations, schedule your call today to learn how Booster can serve you.

### 7. What is Booster's pricing model?

Pricing varies by your fleet's location, fuel type and delivery frequency. Speak with one of our mobile energy consultants today to get a free personalized quote.

### 8. Does Booster integrate with Fuel Cards?

Yes, we integrate with WEX, Voyager and Comdata.

### 9. How will I know if my fleet has been fueled?

You'll have access to a personalized dashboard to view and manage your fleet's fueling events, schedule, payments, telematics and much more.

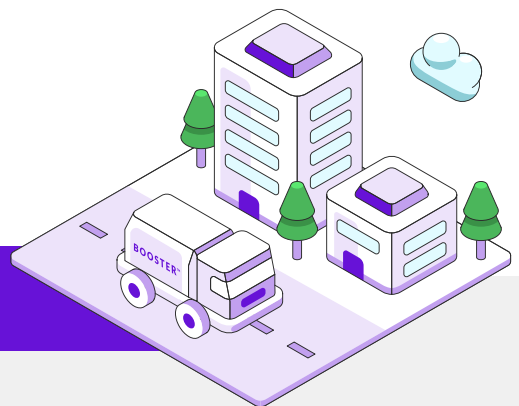

### 10. Is mobile fueling safe?

Booster adheres to the highest safety standards, meeting or exceeding all DOT, EPA, fire and air quality requirements for transporting, storing, and dispensing fuel safely. Our service professionals are comprehensively trained to ensure safety is always their priority, and we have a zero-drip policy thanks to our Perfect Boost spill prevention protocols.

### 11. How can I sign up for mobile fueling?

Speak with one of our mobile energy consultants today.
