

BOOSTER®

How Mobile Fueling Works with Booster

Booster is reinventing the way vehicles are fueled while unlocking deep data insights that improve efficiency. By fueling your vehicles overnight, your team starts each day ready to service your customers.

1

Booster Smart Tanker fills up directly at the terminals with Unleaded and Premium Gasoline, Diesel and Renewable Diesel.

This eliminates:

Costly USTs at fleet yards causing underground leaks, water contamination and harm to the environment.

The amount of CO2 emissions being released into the atmosphere (avg. of 14% reduction in carbon emissions per vehicle a year)

BOOSTER FUEL

High-quality, wholesale fuel purchased directly from the source

2

Booster Smart Tanker arrives and fuels your fleet overnight.

This prevents:

Employee fuel card misuse and fraud

Gas and miles wasted from multiple vehicles traveling to get fuel. (avg. 211 miles and 13 gal per year)

SAFETY

Perfect Boost: Three-stage prevention protocol with zero-drip policy based on fire/hazmat safety standards (reduces further vapor emissions)

3

Drivers begin every route with a full tank.

This saves:

An average of \$1600 per vehicle per year on the costs associated with fueling.

Unproductive driver time spent at the gas station (avg. of 20 minutes spent per gas station trip)

ADDITIONAL SAVINGS

Gives drivers time back (31 hours per driver per year)

Maximizes labor and efficiency (8% efficiency improvement)

Eliminates unnecessary CO2 emissions (average of 2.87 lbs of CO2 per fill)

With Booster, we have saved over 4,000 hours of employee time that has gone back into customer relations... It also means that each car a customer picks up has a full tank of gas.

Enterprise Rent-a-Car

Learn more about Booster's mobile fueling service and find out how much hidden time, money and efficiencies we can unlock for your fleet!
